APP: W@KE UP!

DEVELOPER: MANA MEHRAEIN

SPRING 2018

APP DEFINITION STATEMENT

W@keUp! Is an iOS app that gets a location you want to go and lets you set an alarm to wake up before arrival. With W@keUp! You will never lose your stop!

KEY FEATURES

- This app uses three different maps (API's) to do the navigation and approximate arrival time,
  Maps are as follow:
    - Apple map
    - Google map
    - Waze
- The approximate arrival time would be calculated using the three mentioned maps and user can choose one
- User can choose to wake up either by arrival time or distance
- User can choose different ringtones as the alarm sound
- The alarm can also follow by vibration
- User can save some addresses as favorites

USER PROFILE

Target audience could be anyone (male or female) using public transportations or passengers in any car.

Age range would be 5 and above.

TECHNOLOGY ITEMS

- Third-party API from following companies:
    - Apple map
    - Google map
    - Waze
- Core Location with Map Kit
- User would be able to choose a ringtone and set ringtone in a table view controller
- User can choose to have vibration with ringtone
- Pickers to select desired time or distance
- Tables to display favorite addresses
